HYP 2022-2023
Design and Development Project:

Application Specifications
for AUGUST-SEPTEMBER exam session

Web site for an International Summer School

See document **Design Project-General Instructions** for details on the **design work** to be done and reported

See instruction document for the implementation work to be done and reported

GOAL

Create a website for a Summer School.

A summer school is an intensive full time course (normally lasting for one or two weeks) during which attendee (typically master/pHD students or young researchers) attend lectures and are engaged in team-work (e.g. project work, pitches) and social activities (e.g., trips, team-building tasks)

Examples:

https://summerschool.eitdigital.eu/innovative-digital-technologies-for-health

https://www.aidlda.it/

IMPORTANT: the following are the contents requirements for the web site that must be **DESIGNED and IMPLEMENTED**

Content Requirements

MAIN CONTENTS NEEDED

- The **Summer School** in general

- **Daily Schedule** of activities

- **Lectures** offered at the Summer School (≥**15**), each one described by a short description including the speaker and what is being lectured as well as practical information (when, where)

- **Speakers** (≥ **7**) teaching at the Summer School each one described by a picture, and a very short CV (concerning his/her education, past job experience, main expertise...)

- **Social Activities** (> 4), such as trips or team-building sessions, described by a picture, a short presentation, and practical information (e.g., when and where they take place)

Content Requirements

RELATIONSHIPS

- A Speaker **teaches** one or more Lectures
- A lecture is **taught by** one or more Speakers

GROUPS

- ALL SPEAKERS
- ALL LECTURES
- ACTIVITIES (lectures or social activities) BY DAY
